Top 1 Android Unlock Removal to Solve your Problems at ease 5 screen lock types are available: pattern, PIN, password, fingerprints, and Face lock Unlock 20,000+ models of Android phones & tablets Everybody can handle it without any technical background Provide specific removal solutions to promise good success rate If you've forgotten your Android phone screen lock solution, just use the Dr.Fone - Screen Unlock (Android), the best Android phone unlocking software. This software prepares you with simple instructions, wherein you can unlock your Android device screen within minutes, and save you from ending up with a locked phone after too many pin/passcode/pattern attempts. You can even unlock part of Samsung and LG devices without data erasing, so you can still access the data after unlocking. Most softwares need to erase all data on the phone once the device is unlocked and you cannot get the data back anymore. That's terrible if you have many precious videos, photos, or other data on your device! Right? Try It Free! Try It Free 4,624,541 people have downloaded it safe & secure Step 1. Initiate Dr.Fone on your computer, and select "Screen Unlock" You can also use this tool to unlock other Android phones including Huawei, Lenovo, Xiaomi, etc., the only sacrifice is that you will lose all the data after unlocking. Then connect your Android phone. Click on Start to initiate the process. Step 2. Follow the instruction below to boot your Android phone into Download Mode Set your phone into the Power Off position. Keep the home+volume+power buttons down simultaneously. Click on the Volume Up position to initiate Download Mode. Step 3. Complete Downloading The Recovery Package Once your Android phone is in Download Mode, the recovery package begins to download. Wait until the process is completed. Step 4. After the recovery package is downloaded, the Android unlock software begins the lock screen removal process. After completion, your Android phone is unlocked without the need to enter passwords. You now have access to all data on your Android device with this Android unlock software free download. However, if you have trouble bypassing your Samsung Google account (FRP), the FRP removal function of Dr.Fone-Screen Unlock can be helpful. Unlockitfree.com is a free remote unlock service, providing unlocking codes for LG phones and other models. They offer a fast and free service, but it is not always reliable. How to use the Unlockitfree.com Unlock Service? 1. First, enter your phone's unique IMEI into the site, and then the site checks to ensure that it is genuine. 2. Choose your phone model from the list provided, and then choose your country. Once you choose your country, a list of supported Service Providers will pop up. Choose your service provider, read the terms and conditions and accept. At this point, click Generate. 3. The Unlockitfree Generator will show you a series of 7 different unlocking codes. Not all of these will work; usually the best options are the 1st and 7th code on the list. 4. Without removing your SIM card, input these codes into your phone's Home screen. Hopefully you will have success - although, this is not guaranteed (as it is with the first Dr.Fone option above). by Sophie Green Updated on 2021-12-30 / Update for Unlock Android Recently, a user on the Google forum reported that "How to unlock a Google locked phone?" Several reasons may get your Google phone locked. Moreover, you might have to lock your phone if you have lost it. However, Google locks your phone if you lost your password. Most of the time, you buy a Google locked phone and you don't know how to unlock it. Following this, we've assembled this helpful guide for you. Are you still wondering, "What's Google locked meaning?" then here is a quick answer for you. It's more like applying a smart lock on your Android device. The Google lock automatically locks your device when it's not with you and unlocks your devices when you have it or are in safe hands. If you're wondering, "Google lock my phone, what should I do?" then Tenorshare 4uKey for Android is here for you. It is a professional Android lock screen removal focusing on quickly and easily bypassing the passcode, including pattern, PIN, password, and fingerprint. And it also helps bypass the Google account lock on Samsung after you factory reset it. After installing 4uKey for Android on your computer, connect your Samsung device then choose the feature "Remove Google Lock (FRP)". Now, you will jump to the next screen. Please check the choice and click "Send Notification". Tenorshare 4uKey for Android will send a notification to your Samsung device. Please don't disconnect your phone during the process. Once you receive the notification, click the "View" option on your Samsung device, and follow the on-screen prompts to operate your device. Last, you need to reboot your device and use the unlock pin code you just set to access your Samsung device. Google Assistant makes it pretty easy for you to lock your phone even if it's away from you. However, setting up a Google Assistant requires some steps that need to be followed. Google Assistant allows you to add routines or customer commands/command chains. Moreover, there are a lot of apps that can help you in setting up custom commands for Google Assistant. You can select an app depending on your purposes such as: Screen off To activate this option, you need to perform these steps: Open your Google app and tap on More Button. Click on Settings and then Google Assistant. Select Routines. Add a new customer command by clicking on the Plus Button. Screen lock The screen lock allows you to lock your phone by just saying, "Ok Google lock my phone. You might be wondering, "how to do it?" Here is how to do it: Open your Google app. Tap on the More tab. Move to Settings and then Voice. Tap on the Voice Match. 2. What's ok Google unlock my phone and how to use Unlocking a phone with Google Assistant is one of the simplest ways to adapt. All you need to do is to say, "Ok, Google unlocks my phone". Yes, it's that simple. Before setting up a Google Assistant, you need to ensure the following: Register a reliable voice model with Google Assistant. In Google Assistant's settings, enable the Voice Unlock. If you don't know how to set up the Google Assistant to unlock your phone then here's how to do it: Open your Google Assistant app. Go to settings by clicking on the blue Drawer icon or three dots. Under Devices, tap on your phone. Enable Access with Voice Match and Unlock with Voice Match. If you're wondering, "Google lock my phone, what should I do?" then this article is specially crafted for you. We've discussed some effective and efficient ways to perform the Google locked phone unlock. For you, Tenorshare 4uKey for Android is probably the best tool to unlock your phone without any problem. It's the best tool to remove all types of screen locks, patterns, pins, and passwords. Q1: Google locked phone for sale If you're currently looking for Google locked phone for sale, then there are countless online websites you should review. However, before buying a Google locked phone, you must find alternative ways to unlock a particular phone. Q2: Google locked phone after factory reset how to do? Most of the times, people unlock Google locked phone by implementing a factory reset. If you're unable to do so, you can use 4uKey for Android to solve this problem quickly and safely. • Filed to: Android Unlock • Proven solutions Mobile pattern locks are an excellent invention for unlocking screens since they eliminate the time taken while typing other passwords or numbers.
